Indigo BioSystems ASCENT™ Launched and Makes Immediate Impact at MSACL

San Diego, CA (02/15/2011) - Indigo BioSystems is pleased to announce that its newest product, ASCENT™ was formally launched last week at the Mass Spectrometry Association of Clinical Laboratories (MSACL) conference at the Sheraton San Diego Hotel and Marina in San Diego, California.

ASCENT™ received widespread attention and created quite a buzz at MSACL with its utilization of advanced algorithms and superior informatics technology to make it easy to get patient results out of a mass spectrometer. At the conference, AIT Laboratories, Indigo BioSystems' newest customer, presented a poster titled *Increased Process Efficiency in UPLC-MS/MS Data Review Through Use of Rules-Based Software Automation* which provided many insights on how AIT is using ASCENT™ for high throughput LC-MS quantitative assays.

Indigo BioSystems designed ASCENT™ to automate chromatographic data analysis and review for laboratories that utilize mass spectrometry as a clinical diagnostic tool. ASCENT™ is an expert system for mass spec quantitation that enables laboratories to quickly and easily obtain high quality results. By applying ASCENT™ in a diagnostic lab, scientists have shown that they can dramatically reduce their analysis time while enhancing quality and reducing costs.
