## **Indigo BioSystems Expands Its Product Development Team**

**Indianapolis, IN, August 1 2006:** Indigo BioSystems, a software technology company based in Indianapolis, Indiana, announced the expansion of its product development team with the addition of Kent Laursen as Director of Product Development and Amy Tabert, Ph.D. as Sr. Scientist.

“These key additions to our product development team emphasize the commitment Indigo has made to the development of quality scientific products. The expertise of Kent and Amy expand our knowledge base not only on engineering great solutions, but also on understanding how our products can benefit the customer and solve their most pressing problems,” said Randy Julian, CEO of Indigo BioSystems.

Kent Laursen brings to Indigo BioSystems over twenty years of experience in software solutions with agile, object oriented development methods. Kent was most recently at Genomics Life Sciences Software, of Victoria, British Columbia, Canada, where he where he contributed to the technology vision, development process and platform architecture. Kent continues to be an active contributor to bioinformatics standards groups, including the Proteomics Standards Initiative PSI and the Functional Genomics Experiment working group. Kent will have leadership responsibilities for developing and maintaining a solid architectural foundation to Indigo’s products and leading the product development team.

Amy Tabert, Ph.D., brings a unique experience of research instrumentation, chemistry, and informatics. Amy was most recently a Post Doctoral Research Associate under the direction of Dr. Graham Cooks, a pioneer in Mass Spectrometry instrument and processes development. Amy will be responsible for ensuring the science and the scientist’s workflows engineered into Indigo’s products are the most advanced and reliable in the market.

### **About Indigo BioSystems**

Founded in 2004, Indigo BioSystems, Inc. is a privately held software technology company focused on developing standard based solutions for Life Sciences.
